

# THE MIND GALLERY

---

[www.mindgallery.com.au](http://www.mindgallery.com.au)

The Mind Gallery offset 100% of its direct greenhouse gas emissions produced in 2010 by supporting a CO2 Australia reforestation project. CO2 Australia establishes and manages Australian eucalypt forests which contribute to native wildlife habitat and reduce the effects of soil erosion and salinity.

In addition to this, The Mind Gallery tries to use recycled and eco friendly materials in its processes.

## Waste Management

- ✓ Use of environmentally friendly products
- ✓ Reuse signs, name badges etc
- ✓ Locally sourced food/manufacturers
- ✓ Encourage a reduction in paper usage by communicating electronically
- ✓ Recycle paper, rubbish, print cartridges, aluminium, metal etc.

## Energy Management

- ✓ Energy efficient globes.

## Strategies Implemented

- ✓ Tree planting
- ✓ Carbon offsetting.
